Icon Key

DOUBLE CYCLONE®

Double Cyclone indicates the cleanest and most powerful flushing system for HETs available on the market today.

E-MAX®

E-Max indicates high performance, HET flushing technology with a wide flush valve, large trapway and extra-large syphon jet.

G-MAX®

G-Max indicates a flawless, quiet and powerful flushing system with gravity-fed boost to performance.

DUAL-MAX®

Dual-Max indicates a dual flushing system that optimizes conservation by allowing you to select 0.9 or 1.6 GPF.

SANAGLOSS®

SanaGloss glaze prevents debris, mold and bacteria from sticking to ceramic surfaces, leading to fewer chemicals and less water in cleaning.

ECOPOWER®

EcoPower indicates sensor faucets and sensor Flushometer valves that are powered by flowing water.

SMA THERMOSTATIC VALVE TECHNOLOGY

Thermostatic valve that features Shape Memory Alloy (SMA) technology for reliability and maintaining consistent water temperature.

SKIRTED DESIGN

Skirted Design indicates toilets featuring TOTO's 10", 12", and 14" Unifit Rough-In and concealed trapway design.

UNIVERSAL HEIGHT

Universal Height indicates toilets that allow for a more comfortable position across a wide range of users.

ADA

Product complies with Americans with Disabilities Act accessibility guidelines.

WATERSENSESM

Products that meet the EPA standards for water efficiency and performance criteria. Toilets are 1.28 GPF, faucets are 1.5 GPM and showers are 1.75 GPM.

The world has changed.

Pretty is no longer enough.

Standard is no longer enough.

The world wants more.

I want more.

I want

PERFORMANCE WITH PURPOSE.

DESIGN WITH A CONSCIENCE.

INNOVATION WITH A HEART.

QUALITY YOU CAN FEEL.

Today, most bath products do their job pretty well. But just showing up for work isn't enough anymore. You want fixtures that save money and water without sacrificing an ounce of performance. And the peace of mind that comes from knowing you bought a brand that sets the standards for world-class performance, enduring quality and reliability. And, of course, you want fixtures that can do it all with effortless beauty. That's what TOTO is really all about – connecting you with water in ways that enrich the flow of your everyday life. It's our passion. It's our mission. And it's pure TOTO.

QUALITY

ENDURING QUALITY

All TOTO products pass multiple performance tests to ensure quality, reliability and customer satisfaction. But what really matters is knowing that you'll feel just as good about your decision to buy TOTO next year, and the years after, as you do today.

WORLD-CLASS PERFORMANCE

With more "firsts" than anyone else, TOTO leads the world in innovating products that simply perform better. That means peace of mind, knowing that your TOTO fixtures will perform at the highest level, day in and day out, year after year, and look beautiful doing it.

PERFORMANCE

ENLIGHTENED DESIGN

TOTO showers, toilets and faucets can save 20-63% on water usage bills. You use less water and save money without losing an ounce of performance. And TOTO is the only plumbing manufacturer to receive the EPA's Water Efficiency Leader Award.

DESIGN

REAL HUMAN VALUE

The day you install TOTO is the day you start saving with TOTO. Because with every use, you save money and water, while gaining something of real human value – the confidence that comes with buying the right product for all the right reasons.

VALUE

you + water

Neorest® II Vessel Lavatory with LED Lighting

LLT993#63

Introduce a stylish, new addition to your bathroom with the Neorest II Lavatory and Faucet from TOTO. Enriched by our long history of design and innovation, this duo is the perfect combination of style, function and relaxation.

The lavatory's unique design is inspired by the way water forms on a sheet of ice and is made of Luminist, a material TOTO developed that is scratch and heat resistant. It gives the essence of glass while the LED lights help set the mood for relaxation. The complementary faucet gives it a modern edge with a sleek and slender spout that looks more like a work of art. The faucet control allows for either 2.0 GPM for a regular flow or 1.35 GPM for high efficiency. It also serves as a temperature indicator, emitting a red glow from beneath the control for hot water or blue for cold water.

The soft sloping curves of the lavatory coupled with the minimalist profile of the faucet make it an ultra-chic choice for an array of design sensibilities. While the beauty speaks for itself, the advanced technology will excite your senses and improve your entire bathroom experience.

*Neorest II lavatory is compatible only with Neorest II faucet and is sold separately.

DuoFit™ In-Wall Tank System

WT151M#01, WT152M#01

TOTO's DuoFit In-Wall Tank System is a true testament to our commitment to great design, water savings and making life easier for our customers. This system features a high-efficiency dual flushing system that optimizes water usage by allowing the user to choose 0.9 GPF for liquid waste or 1.6 GPF for solid waste. Because the tank is behind the wall and the toilet mounted off of the floor, you also gain more bathroom space and cleaning around the toilet is much easier.

The combination of concealed tank and wall mounted bowl has a European flare, offering a clean and contemporary look. The decorative push plates are available in three unique shapes and styles making this system a perfect choice for an upscale residential or luxury hospitality installation.

Rectangle
YT800#WH

Round
YT830#WH

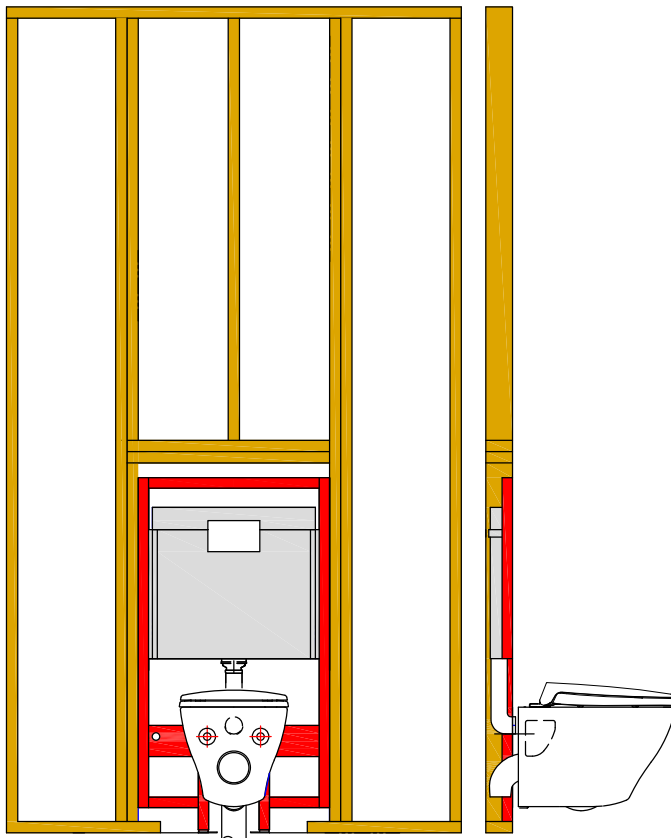

Convex
YT820#SS, #CP

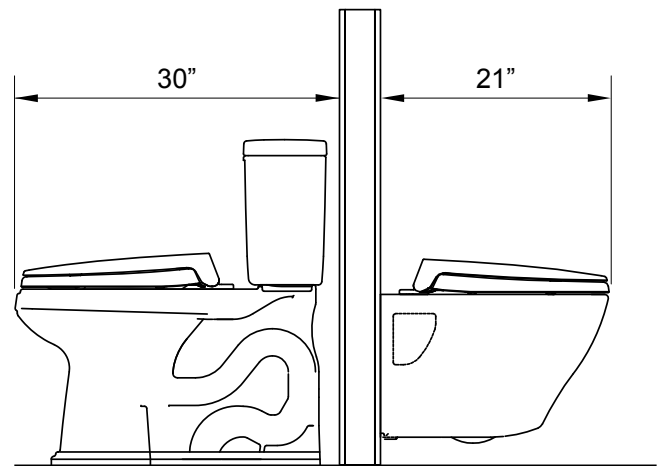

- 0.9/1.6 gpf dual flush - Decorative push plates sold separately
- Installs in 2" x 4" or 2" x 6" wall—perfect for both residential and commercial applications
- Insulated tank resists internal condensation, one-piece design eliminates leak points
- Mounting of bowl rim height adjustable from 15"-19"
- PVC & Cast Iron outlets available (PVC only for 2" x 4" install)
- Supports up to 880 lbs.
- Washlet water outlet standard for easy connection. (Washlet sold separately)

* 2"x4" PVC Outlet will be available in 1Q 2011

Front View

**9" of space saved
over traditional floor-
mounted toilets**

How is the frame attached?

The frame is bolted to the studs in the wall. Bracing above the carrier, between the studs, is recommended. Rough-in dimensions are available on specification sheet available on www.totousa.com.

What if the tank components need service after installation?

The fill valve and flush valve can be removed for service at anytime after installation through the access port, located behind the dual-flush control panel.

How can I be sure the tank will not leak?

The plastic tanks are blow-molded from durable Polyethylene and are pressure-tested to ensure a leak-free installation. There are no tank seams or threaded supply connections beneath the water line. In the unlikely case that the fill or flush valve should develop a leak, water will drain into the bowl and overflow into the waste connection, ensuring safety and peace of mind.

How is the water supply line connected to the tank?

The supply line runs along the wall stud on either side of the frame and connects via a standard 1/2" supply threaded fitting to the top of the tank. The connection then continues internally from the top of the tank to the fill valve via a supplied flexible hose.

Aimes®

Inspired by timeless design but with a twist of modernism, the Aimes faucet and shower fixtures blend two design aesthetics together to make it a perfect choice for a variety of décors. The marriage of these styles brings together historical inspirations in a new innovative way that creates a distinctive impression.

The unique transitional design principles are most apparent in the faucet which blends the traditional curves of nineteenth century designs with a surprisingly sleek, unembellished profile. A lamp shade inspired showerhead and a handshower that is similar in shape to an antique handheld mirror illustrate the design's take on traditional styles, updated for a more contemporary audience.

Aimes® High-Efficiency Toilet

The Aimes toilet complements the transitional style of the suite and perfectly completes the design-oriented home. This new toilet increases TOTO's selection of products that truly define value with quality, high-efficiency, performance and today's best innovation.

TOTO's new Aimes high-efficiency toilet (HET) incorporates the Double Cyclone flushing system, which delivers the most effective 1.28 GPF performance for the best customer satisfaction. The Double Cyclone system also works without rim holes, so there are fewer places for debris to collect, leading to easier cleaning and consistent performance. Using 20% less water than traditional 1.6 GPF models, the Aimes toilet saves water and money while providing TOTO's legendary quality for customer satisfaction. In addition, SanaGloss glaze prevents mold and debris from forming on the ceramic surfaces, resulting in less cleaning and fewer harsh cleaning liquids that can be expensive and harm the environment.

Aimes® One-Piece Toilet

MS626214CEF(G)

- Double Cyclone® high-efficiency flushing system (1.28GPF/4.8LPF)
- SanaGloss® ceramic glaze (not available on Ebony #51)
- Universal Height
- Decorative one-piece design
- Elongated front bowl with SoftClose® seat (SS214)
- 12" Unifit® rough-in standard, 10" and 14" optional
- Chrome trip lever standard, other finishes available

Aquia®

Inspired by European styles and lifestyles, Aquia infuses organic design principles with characteristic TOTO innovations. Suite traits include soft contours and a mix of flat, square surfaces with smooth curves. The suite is very distinct in its metropolitan appeal, especially against the backdrop of the many stark, overly-squared designs in the market today.

As a testament to its versatility as a suite, Aquia also includes single-hole faucets of varying heights to complement a variety of lavatories, matching accessories and a full shower offering for complete style and relaxation. Aquia offers a chic, metropolitan option that is at home in a variety of bath settings.

Upton

Taking cues from contemporary design elements, the Upton Collection updates conventional geometric shapes with softer, more fluid edges. At first glance, the rectangular lines and smooth planes give it an industrial feel, but with the soft curves of the edges, Upton becomes a very versatile style for any luxury bath space.

The Upton single-hole faucet is offered in two different heights, making it easy to pair with many different vanity styles or lavatories. The shower system offers a square overhead shower, matching handshower, wall spout and trims, and the coordinating accessories complete the suite with the same distinctive straight lines and smooth contours.

Freestanding Bath Tub Fillers

TOTO freestanding tub fillers are a modern take on a classic fixture. Available in two styles, these fixtures offer an updated look for more contemporary bathrooms designs. The tall, statuesque single-handle tub filler combines straight lines and geometric angles while the two-handle tub filler has a softer feel with fluid, rounded curves. Both fixtures mount directly to the floor and are adaptable to many installations.

Gyrostream® Bodyspray

TS100J

- Water flows through nozzles that tilt and rotate, resulting in more consistent water distribution
- The swirling water does not just pulsate—it actually massages your muscles and stimulates circulation
- The spray kneads with a unique double axis that creates the distinctive water action
- Provides a balanced temperature, so your body stays warmer
- Uses only 0.8 GPM, 53-60% less water than common bodysprays
