### Notes

C100™ was previously known as the Chloe™.

TCF250U model was later replaced by TCF250UR model (next page).

Flushometer Adapter Kit TCH314FV requires Connection Hose THU588.

A Junction Valve will not be used with this kit.

Junction Valve THU587 and Connection Hose THU588 were later replaced by quick connection design Junction Valve THU661 and Connection Hose THU660 as seen with the emergence of the TCF251UR model (next page).

Junction Valve THU587 is obsolete; however, Junction Valve THU661 (next page) can be converted back to THU587 if needed by removing the gray quick connector.

Mounting Plate THU600 (early design) has locking clips that are 6-11/16" (170mm) apart, which makes this plate not interchangeable with THU635 (next page).

Mounting Hardware THU599 is required. To acquire both the mounting plate and the hardware, use alternate part number THU601 as seen with the Warmlet SH104.

Fiber Washer 9BU9152 replaces original rubber washer design.

TOTO Sales can order 0GU504 template on TOTO Partners.com
