CLEANSING FUNCTIONS
WITH THE TOUCH OF A BUTTON, A WAND EXTENDS FROM UNDER THE SEAT FOR SOOTHING WARM-WATER CLEANSING.

How WASHLET® works

AIR-IN WONDER-WAVE technology is the precise, pleasant, air rich stream that keeps you clean. As water is fired at different speeds, small droplets collide with larger ones, combining and expanding as the droplets fill with more air. The injection of air enlarges water droplets by around 30%.

Select the type of cleansing you desire each time.

REAR SPRAY
The rear spray is designed to clean the rear intimate area. It features pleasant, yet strong water pressure to target this specific area.

REAR SOFT SPRAY
It has a larger radius to cover more area. Lower water pressure makes for a soft, comfortable spray.

FRONT SPRAY
The front wash consists of large, soft drops for comfortable intimate cleansing - for a clean, fresh feeling.

WIDE FRONT SPRAY
It has a larger radius to cover more area. Lower water pressure makes for a soft, comfortable spray.

TOTO WASHLET TECHNOLOGIES
For greater performance and hygiene in the bathroom.

This thorough cleaning occurs inside the wand as well as all around the exterior. Even when the toilet is not being used, the wand periodically cleans itself to ensure constant hygienic conditions.

Using the incoming water supply, a pre-mist wets the toilet bowl surface aiding in the elimination of waste approximately 80 percent better than a dry bowl.

*Not available on A200 and A100

Highly effective deodorizing automatically takes places inside the toilet bowl both during and immediately after use, leaving no disturbing odors.

*Not available on A200 and A100
The toilet seat immediately warms when the toilet is approached, ensuring a warm comfortable seat any time.

Eliminating the need to touch the toilet surfaces, the lid automatically opens and closes when the toilet is approached and departed.

Enjoy the ease and comfort of drying with the temperature-adjustable warm-air dryer.

*Not available on A200 and A100

*S550e and S350e only

WASHLET® INSTALLATION REQUIREMENTS
For when your existing toilet is in need of an upgrade.

The following four-part diagram details the approximate measurements and requirements for installing most WASHLET models on existing toilets. Note that some styles of toilets may not allow the WASHLET to fit properly due to certain contours where the tank meets the bowl.

1. Elongated seats approximately 18-1/2 inches* (470 mm) from mounting holes to front of bowl.

2. Minimum of 2 inches** (50 mm) from front face of tank to the center of mounting holes.

3. Approximately 5-1/2 inches (140 mm) from the centers of the seat mounting holes.

4. Minimum of 8 inches (203 mm) of open space from center of toilet to edge of flat bowl surface.

*Approximately 16-1/2” (420 mm) for round WASHLET seats.
**Minimum of 1-3/4” min. (45 mm) for WASHLET S350e and S300e.
