NOTE

Following the federal mandate for water efficiency outlined in the Environmental Protection Act of 1992, faucets can be rated for water consumption based on two categories: Flow Rate and Water Consumption. TOTO uses the water consumption standard because it is the most accurate method of measuring water use. TOTO faucets also comply with the CALGreen Guideline of water usage.

Water Saving

On-Demand [10 sec.] faucet (0.18gpc)
30% less than Federal Standard (0.25gpc)
10% less than CAL Green (0.20gpc)

Controller

The IoT daughter card installation requires minimum 13/16" (20mm) clearance on the leftside of the controller. Please refer to the diagram, as shown.

The daughter card extends 2-9/16" (64mm) below the controller. Make sure the bottom of the daughter card doesn't hit any obstacles.
